Carousel 6 Place Reaction Station™

Cost effective personal synthesis station for parallel chemistry, process development and synthesis of building blocks

Coled Calouse Hallabe

Accepts 6 x 100ml, 170ml or 250ml reactors

Equal and powerful stirring in all six reaction flasks

Carousel 6 Place Reaction Station[™]

The Carousel 6 Place utilises the same technology as the popular Carousel to simultaneously stir and heat up to six 100ml, 170ml or 250ml round bottomed flasks.

The Carousel 6 Place is designed to be used by individual chemists in their own fume cupboard. The affordability of the Carousel 6 Place brings all the benefits in productivity of multiple parallel synthesis to the chemist at a fraction of the cost of any other comparable system.

Replaces 6 conventional 250ml round bottomed flask and condenser assemblies

Introduction

- Simultaneously performs up to six heated and stirred reactions.
- Choose from six 100ml, 170ml or 250ml glass reaction flasks, or a combination of flask sizes in the same system. Reaction flasks have the following working volumes; 100ml flask - 60ml, 170ml flask - 100ml and 250ml flask - 100ml.
- The Carousel 6 Place fits on a standard Carousel or IKA hotplate stirrer, using existing and readily available technology.
- Utilises the single rotating magnetic field of the hotplate stirrer to stir all the positions evenly and powerfully.
- Heated directly by the stirrer's hotplate; provides an operating temperature range from ambient to +180°C, with temperature accuracy of +/-0.5°C.
- Water cooled aluminium reflux head provides efficient refluxing without traditional glass condensers. Quick-release valved couplings allow disconnection of cooling water without the loss of water.
- · A stainless steel central inlet/outlet for vacuum and inert gas, combined with a radial gas distribution system and gas tight PTFE caps, allows reactions under an inert atmosphere.
- Round design makes all reaction flasks visible and allows easy addition of reagents and solvents; with no need to lean into the fume cupboard.
- Reliable maintenance free operation with no electrical or moving parts.
- Easy to operate and set-up, with minimal training time.
- · Compact size with a small bench-top footprint.

Boils six 250ml flasks of water in less than 25 minutes...

Interchim - Hotline 33 (0)4 70 03 73 01 - Fax 33(0)4 70 03 82 60

Carousel 6 Place[™] will increase the productivity of your chemistry

Choose from 100ml, 170ml or 250ml round bottom glass reaction flasks...

Central inlet/outlet for vacuum

and gas, combined with a radial

gas distribution system and

gas-tight PTFE caps allow reactions under an inert atmosphere.

New Cooled Carousel 6 Place™ Cost effective low temperature parallel synthesis from ambient to -70°C. Accepts 6 x 100ml, 170ml or 250ml reactors

Round design makes all reaction flasks visible; with no need to lean into the fume cupboard.

> Water cooled aluminium reflux head provides efficient refluxing within individual glass reaction flasks. Quick-release couplings prevent water loss during set-up/breakdown.

Provides six heated and stirred glass reaction positions, with a range of reaction vessels

> PTFE heat protection ring helps protect user from contact with hot base.

New rare earth elliptical PTFE stirring bar provides powerful stirring and a deep vortex.

Fits on a standard Carousel or IKA hotplate stirrer, so utilising existing and readily available technology.

Round aluminium base transmits heating evenly to all positions.

Heated directly by the stirrer's

hotplate; providing an operating

temperature range from ambient

to +180°C. Digital temperature

control +/- 0.5°C.

RR99054 - 100ml

Reaction Flask

RR99052 - 170ml

Compact size has small bench-top footprint - easy to store.

Aluminium inserts allow easy removal of flasks and good heat transfer for refluxing.

Utilises the single rotating magnetic field of the hotplate stirrer to stir all the

positions evenly and powerfully.

PTFE cap features an all PTFE

valve, which offers superior solvent

resistance, gas tight sealing and

easy operation.

RR99050 - 250ml Long Neck Reaction Flask

RR99047 - 250ml Flask with Sidearm & Dropping Funnel

Aluminium inserts allow easy removal of flasks and good heat transfer for efficient refluxing

12 3 5 5 5

RR99056 - 250ml Azeotropic Reaction Flask with Sidearm with RR99048 - 50ml Liquid Additions Dropping Funnel

Rapid Heating & Efficient Refluxing

- Circular, solid aluminium base transmits heat rapidly and evenly to all positions.
- Boils six flasks of water in less than 25 minutes.
- Carousel Fuzzy Logic Temperature Controller gives accurate temperature control of either the block or solution to +/- 0.5°C.
- PTFE guard-ring helps protect user from accidental contact with hot aluminium base.
- Removable aluminium inserts in Reflux Head allow easy removal of flasks, yet maintain good heat transfer for refluxing.
- Built in spring clip retains flasks once aluminium insert is removed.
- Acetal quick-release valved couplings on Reflux Head allow disconnection of cooling water without loss of water.

Versatile 250ml Reaction Flasks

- Heavy duty, borosilicate glass 250ml round bottomed reaction flasks have a Rodaviss B24/29 joint for connection to the RR99042 Reflux Tube. The detachable glass Reflux Tube features a threaded top, which when combined with any of the RDT threaded PTFE caps, give an excellent gas tight seal up to 1psi.
- 250ml Round Bottomed Reaction Flask with removable reflux tube RR99040 Allowing for efficient refluxing during synthesis and (after removal of the reflux tube), for the flask to fit directly onto a standard rotary evaporator. Reaction flask comes with RR99042 Reflux tube and Rodaviss connecting set.
- 250ml Long Neck Round Bottomed Reaction Flasks RR99050 A single piece design for ease of use. Features a threaded top.
- 250ml Round Bottomed Reaction Flask with B14/23 Sidearm & Septa port RR99047 Designed for use with either the RR99048 Dropping Funnel or RR99049 Solid Additions Funnel. Supplied with small Rodaviss cap and septum for sealing sidearm.
- 250ml Round Bottomed Reaction Flask with B24/29 Sidearm & Septa port RR99077
 Designed for use with either the RR99078 Dropping Funnel or RR99079 Solid
 Additions Funnel. This larger sized sidearm is better suited
 to the addition of viscous liquids or solids. Supplied with
 small Rodaviss cap and septum for sealing sidearm.

250ml Azeotropic (Dean & Stark) Reaction Flasks

- 250ml Azeotropic Reaction Flask RR99056 This 250ml Reaction Flask with B24/29 sidearm is based on the familiar Dean & Stark design. The all-in-one flasks fit directly into the Carousel 6 Place, allowing the chemist to react up to 6 x 250ml Azeotropic solutions in parallel.
- Vessels feature a replaceable PTFE stopcock for removal of the aqueous phase.
- The B24/29 sidearm will accept either the RR99078 Dropping Funnel or RR99079 B24/29 Solid Additions Funnel.

Liquid & Solid Additions Funnels

- B14/23 (RR99048) or B24/29 (RR99078)
 50ml Liquid Additions Dropping Funnel
 For the addition of larger volumes of reagent directly into the reaction flask. Features a
 Pressure Equalising Arm for ease of addition.
- B14/23 (RR99049) or B24/29 (RR99079) Solid Additions Funnel For addition of powders or solids directly into the reaction flask.

Carousel System featuring 250ml Reaction Flasks with Sidearm and 50ml Dropping Funnel

100ml & 170ml Reaction Flasks

- 170ml Parallel Sided Reaction Flask RR99052
 Designed to maximise the internal volume, yet allows <u>6 flasks</u> to fit in both the Carousel 6 Place and the Genevac EZ-2 Personal Evaporator. Flasks require RR99057
 Aluminium Inserts for use with the Carousel 6 Place.
- 100ml Round Bottomed Reaction Flask RR99054
 Designed especially to allow <u>6 flasks</u> to fit in both the Carousel 6 Place and the Genevac EZ-2 and HT Evaporators. Flasks require RR99058 Aluminium Inserts for use with the Carousel 6 Place.

Compatible with Rotary Evaporators

 Choice of three Rotary Evaporator Adapters - Two for connecting the 100ml or 250ml reaction flask to any Rotary Evaporator with a B29 cone, including IKA, Heidolph and Buchi and one for USA 24/40 Socket to B24 cone.

Rotary Evaporator Adapters

Compatible with Genevac Evaporators

- All of the Carousel 6 Place reaction flasks are compatible with the full range of Genevac Centrifugal Evaporators, including the new EZ-2 Personal Centrifugal Evaporator.
- 250ml EZ-2/HT Evaporation Flask RR99053
 For large quantity post synthesis evaporations, dedicated for use in the Genevac EZ-2, EZ-2 Plus and HT Evaporators. Up to 4 flasks can be used at any time. Flasks feature a GL32 thread. IMPORTANT: this flask is not designed for use with the Carousel 6 Place.
- For assistance in selecting the correct Genevac rack for your reaction tubes or flasks please visit the Genevac web site www.genevac.com

Genevac offer a range of racks to fit all RDT reaction tubes and flask

Genevac EZ-2 Plus Personal Evaporator

RR99047 250ml Reaction Flask with Sidearm, R99048 50ml Dropping Funnel and RR99049 Solid Additions Funnel

RR99054 100ml Reaction Flask, Reflux Tube & Connecting Set & RR99058 Insert

RR99052 170ml Reaction Flask, Reflux Tube & Connecting Se & RR99057 Insert

100ml, 170ml and 250ml reaction flasks will fit directly onto a standard rotary evaporator

Interchim - Hotline 33 (0)4 70 03 73 01 - Fax 33(0)4 70 03 82 60

All caps feature a barbed side arm for easy removal of tubing

RR99062 - Replacement quick release coupling with shut off valve.

RR98059 PTFE Reaction Caps - with PTFE Valve

This popular cap features an all PTFE valve, which offers superior solvent resistance, improved sealing and ease of operation. The cap also has a 'barbed' stainless steel inlet for easy removal of tubing. Other features of the RR98059 (a.) include:-

- PTFE valve allows individual reaction flasks to be isolated or removed during synthesis, whilst the others are still under inert conditions.
- Valve permits on/off control of the gas flow to individual flasks, allowing you to use as many flasks as you wish; simply leave the valve shut on the unused positions.
- Valve can be closed at the end of a reaction to allow the flasks removal whilst maintaining the inert atmosphere.

- Alternatively choose from two other compatible PTFE cap styles.
 - b. RR98068 Cap with suba-seal and barbed sidearm.
 - c. RR98078 Storage cap with suba-seal, but without sidearm.
- Suba-Seal Septum RR98076 Located in the top of the PTFE cap the Silicone SubaSeals permit the addition of liquid reagents via syringe during synthesis, or for the monitoring of the reaction through the withdrawal of aliquots.

Accessories

- Rare Earth 25mm Elliptical Stirring Bar RR99064 Recommended stirring bar for optimum stirring of reaction flask contents. Provides a deep vortex.
- Cork Support Ring RR99061 For bench-top support of individual flasks.
- Tubing RR99067 (2m) For connection of reflux cooling head or inert gas hose barbs.
- Tubing RR99066 (12 x 62mm) Replacement tubing for connecting gas distribution hose barbs to PTFE caps for vacuum or inert gas control.
- RR99062 Replacement Quick Release Coupling with shut-off valve.
- RR99063 Optional 90° Elbow Quick Release Barbed Coupling with shut-off valve.
- RR98094 PTFE Magnetic Stirring Bar Retriever, 350mm.

Radleys Discovery Technologies are specialists in parallel chemistry...

As a dynamic organisation Radleys Discovery Technologies are best able to react to the needs of this constantly developing market sector. Radleys Discovery Technologies specific areas of expertise is focused on apparatus and consumables for parallel synthesis, purification and work-up. The essential products that are the cornerstone of your parallel chemistry program.
