

Product Information

6X DNA Loading Buffer (Blue)

Catalog Number: 99962-1

Unit Size: 4 x 1.5 mL

Storage and Handling

Store at 4°C for 6 months or at -20°C for 24 months from date of receipt.

Product Description

6X Loading Buffer contains density agents for loading DNA samples on agarose or polyacrylamide gels, with two blue electrophoresis tracking dyes that run at approximately 1.5 kb and 200 bp in a 1% agarose gel.

Protocol

Before gel loading, mix 1 volume of 6X loading buffer with 5 volumes of DNA sample for a final concentration of 1X loading buffer.

Note: The loading buffer does not contain fluorescent DNA dye. For one-step loading and DNA staining, see our 6X GelRed® Prestain Loading Buffers under Related Products. PCR products from EvaGreen® qPCR reactions also can be visualized on gels using a SYBR® Green filter without additional fluorescent dye.
